EXPERIENCES

Roland Berger

Amsterdam, Netherlands

Senior Consultant

2024 - Present

- Identified a gap in how global partners tracked M&A pipeline data and independently built a dashboard solution, starting with local office and rolling out internationally across 10 countries, using SharePoint Lists, Power Automate, and Power BI to centralize target profiles, ownership structures, and deal developments across country offices
- Applied Python (outside standard RB toolkit) to solve analytical problems – Highlights: 1) Modelling a 5,000-person org. as a directed graph to auto-generate country org charts, saving 1 week of manual work on an 8 week project; 2) Scraping competitor store locations for a retail client to build a geospatial white spot analysis
- Delivered data-driven recommendations to senior and C-suite clients across 15+ engagements in M&A due diligence, market entry, and strategic planning, regularly presenting to senior leadership and boards
- Designed and led internal data analytics training program (Tableau, Alteryx) to build team-wide capabilities

KPMG Advisory

Toronto, Canada

Senior Consultant (Data & Analytics), Canadian CPA

2019 - 2022

- Engineered a process mining workflow in Alteryx as a Celonis alternative to identify bottlenecks in nurse qualification pipeline, identifying systemic delays and surfacing root causes for operational improvement using >15 years of manually-entered data
- Developed visual analytics dashboards for financial services clients with SQL (>500k rows of data) and Tableau, translating complex operational data into insights for C-suite stakeholders, partnering with data engineers and business partners in 2-3 month engagements
- Built an Alteryx automation workflow for audit sample testing that was adopted across 5 teams, reducing manual effort and improving coverage

Early experiences (Selected internships)

Various, Canada, USA

Shopify, TD Bank, Google

2014-2018

- Early-career internships at Shopify (Financial operations; SQL/Ruby on Rails/Python), TD Bank (Process automation; VBA scripting), Google (Summer student/Scholarship recipient; Python/Web development) established a hands-on technical foundation across fintech and software environments
